Crane 1000 Series Revolving Door — The value choice

Industry-leading innovation & quality

The Crane 1000 Series is the solution when your budget-conscious project calls for the look, function, traffic flow advantage, and energy savings of a revolving door. Fabricated with rigid aluminum construction,

the 1000 Series offers choices that allow you to match the doors to your entrance requirements. You can select from several size options, canopy choices, and custom painted or anodized finishes.

Crafted construction

The 100:1 gear manual speed control and bookfold mechanism are the same as those used on all Crane revolving doors. The primary material is .125 thickness

aluminum construction and iron workers and experienced craftsmen in Crane's Chicago facility complete all door construction.

Speed control

The Crane speed control is a free-wheeling, precision-machined, cast-steel gear-train mounted in the ceiling canopy or floor. It engages the brake automatically as speed approaches a set r.p.m. The brake shoes can be easily adjusted or replaced.

Model AL 1000

The Crane 1000 series offers an expedited production lead time for jobs that have a fast-tracked completion date.

| Material | Finishes | Op Mode | Diameter Options | Enclosure Height | Enclosure | Enclosure Glass | Sightline | Attachment Types |
|----------|--|---------|---------------------------------|------------------|-----------|--|---|--|
| Aluminum | Clear Anodized Dk Bronze Anodized Custom Anodized Painted | Manual | 6'6" (ID) 7' (ID) 8' (OD) | 7'-9' | Glass | 7/16" clear or tinted (center post required) | 4" enclosure base and bottom rail sightline |   |

Bookfold mechanism

The Crane bookfold mechanism meets all state and federal requirements for providing emergency egress. The pressure to engage the bookfold mechanism is adjustable to meet local conditions—for example, stack conditions, negative pressure, and wind conditions.
